

## **ESG Statement**

No consideration of adverse impacts of investment advice on sustainability factors.

Anavio Capital Partners LLP recognises the importance of strategies which focus on Environmental, Social and Governance ("ESG") themes and that have the potential to contribute meaningfully to addressing climate change and other sustainable investment goals. Anavio does not currently pursue such focussed strategies and does not currently consider the adverse impacts of its investment decisions on sustainability factors due to the nature of its current strategy and the tools and resources available to it in order to accurately consider, assess, benchmark and monitor its investments against the key sustainability factors set out in Table 1 Annex 1 of Regulation (EU) 2022/1288 of 6 April, supplementing regulation (EU)2019/2088 of the European Parliament. Anavio has established an ESG Committee which includes senior members of the Investment Manager, which shall research tools and resources to enable it, in the future, to accurately assess the impact of its investment decisions on these important sustainability factors, with a view to developing a comprehensive ESG due diligence tool to assist the investment team with its analysis of investments in tandem with the sustainability factors.
